AMERICA'S COMBAT LOGISTICS SUPPORT AGENCY

Logistics Data Gateway (LDG) Overview (Finance Emphasis)

October 8, 2015

Logistics Data Gateway

- Logistics Data Gateway
 - Overview
 - Transactions by Raw Document Number
 - Interfund Bills by Billed DoDAAC and Bill Number
- MILSINQ
 - Query by Billed DoDAAC and Bill Number

Logistics Data Gateway

LDG Overview

- Logistics Data Gateway (LDG) is a data warehouse environment that provides users the ability to access Transaction Services-managed data/information using business intelligence tools or a web browser.
- Data is generally retained for 3 years
- Billing transactions are retained as far back as 1 April 2005
- LDG queries are restricted to a 31-day search range.
- Unlike WEBVLIPS, LDG can query all Document Identifier Codes (DIC) that route through DAAS (not restricted to requisitions).
- Retransmitted bills are visible in LDG (unlike MILSINQ)
- Password is required due to the COTS software.
- Reports can be saved in several formats: e.g., PDF, .CSV, Crystal Reports, etc.

Logistics Data Gateway

Available Queries

- Historical Requisition Counts by Project Code
- Interfund Bills (by Buyer or Seller) and Bill Number or DAAS Received Date
- Project Codes
- Raw Transactions by Document Number
- Raw Transactions by PIIN and Call Order
- Transactions by DoDAAC and DIC (Document Identifier Code)
- Transactions by Header Destination COMMRI
- Transactions by NSN/DIC/Document Number
- Transactions by Originating COMMRI (External View)
